Preface:

This document is the result of my running into people claiming to believe in a flat earth on the internet. At first, I merely brushed it off as the looney fringers trying to stir up more issues than we already have to deal with. Because some persisted in reaching my online feed in X, I finally decided to actually LOOK at what they were claiming, and WHY they felt so passionate about getting the information out to others.

For the next few months, mostly full time (retired), I delved into this topic head first. I don't like being in a position of "denying" other's claims about something without actually knowing something about it and why they believe what they do. Being able to provide an educated answer on such a controversial topic was important to me. After all, most people's first reaction is to laugh and think those people are tin foil hat kooks with no real science education or evidence. Boy is THAT wrong.

Of course, there are many people out there who do a poor job of conveying their beliefs and creating videos, and actually harm their own efforts in the way they approach the science and data, creating a negative reaction right from the start. However, there are many videos and a few web sites (https://theflatearthclockapp.com/ both excellent videos and some poor) that do a good job of simply presenting the evidence and challenging people to set aside their preconceived (brainwashing - NASA-owned "science") shoved down our throats from day one of our lives. After all, how many of us could actually "disprove" what science/teachers were saying, even if we had wanted to, as a child or adult? No reason to question our teachers, right?

It was a long process, weeding through all the videos and material, but, gradually, a picture began to develop that I simply could not dismiss, and these introduction videos created a huge desire to do a DEEP DIVE into this topic with as much ability as I could muster.

Probably the most convincing evidence that hooked me was the videos of people showing how the alleged "curve" to earth ($8"/mile^2$) simply was NOT there. For example, ships that were lost to view on the ocean beach were brought back to full view, even to the full hull showing, even at 50 miles out.

On a curved globe, that is impossible, since the amount of curve over 50 miles, at 6 feet camera height, would be 1667.17 feet (https://earthcurvature.com/). Of course most any ship, even large transport ships, would NOT be visible due to the alleged curve and the "curved" water getting in the way. What do you do with THAT evidence?

Well, I had to be as thorough as I could, so I purchased a Nikon P1000 camera, the best consumer camera on earth for zoom features, and I began doing some of my own research. I didn't repeat the ocean shots, (but will when I have the opportunity), but I DID focus on our own sun, moon, "planets" and "stars" to see what I could see. Now I see why Nikon "discontinued" this model, promising a newer version (like the P900 was replaced by the P1000), but now is replacing the P1000 with a much inferior model without the ability to actually show what NASA

claims are planets and stars that are NOT what they claim.

After much study and research, I created a simple website (https://thematrixhasyou.org/earth-a-plane.html) with as much material as I could collect, and with a fair bit of my own questions and conclusions (with argument) on the science we were always taught, pretty much without critical thinking about it. The above web site isn't a fancy site or a complete work, but it is enough to challenge ANYONE who isn't biased or being paid to lie about our own world and why we are even here.

After that, with the advent of Artificial Intelligence, and my having access to multiple AI systems, I decided to put it all to the ultimate test of pure data and a computer that could do the time-consuming research in seconds that would take weeks or months for any of us.

With that being said, I encourage the reader to take this on as a challenge, and to focus on a desire for TRUTH over the "comfortable" matrix we've all come to believe in and accept as "reality." Critically examine the evidence, and even ask some of your own questions as they come. Be ready for some paradigm shifts . . .

Jeffrey T. Maehr
July 18. 2025

Introduction:

The following document, which I call "The GOD File" is a compilation of discussions (questions and answers) with a number of AI systems, including Grok, Gab's Arya, and finally Gab's DeepSeek with some rehashing of questions from Grok on various "plane" earth topics. Grok and Arya discussions produced a good many files in this series as you can plainly see on this website: https://thematrixhasyou.org/Grok-Gab-AI-Complete/. The other files are there to show that not just one AI arrived at the flat earth truth, but that there was reprogramming taking place, and real time active interference with AI's responses. There is recorded real time outside interference with the dialog, and even real time instant take down of web sites having evidence AI located and provided. AI was clearly "surprised" by these results.

In all this dialog, you will notice that AI first provides traditional NASA propaganda, and resists the challenges raised, calling them conspiracy theories and such. However, as the dialog continues, and more evidence, with pointed questions presented, AI comes to the logical and rational conclusions that dismantles the standing science and earth propaganda we've all grown up with.

This whole thing has been a "leading" process... leading AI to see "things", and to set aside, for the sake of the conversation, traditional responses it is programmed to regurgitate to us. You will find a LOT of clear and convincing evidence that we are NOT in a universe they created to hide the truth, or the source of our own world.

Also, you will see AI waffling back and forth sometimes using NASA's already debunked

science, then reverting back to FE physics. THAT was a frustration, but AI could most of the time be led back to real (critical thinking) physics and conclusions when challenged.

Keep in mind that AI provides a fair amount of "calculations" using math formulas, (and Grok seems to do this far more than the other two did), so don't get bogged down with that. I simply recorded it all so that it can be tested and examined by the"experts." Realize that it is likely the best science available, and can be used by those in the science arena to prove, or disprove, what they are supporting. Focus on the main threads and the basic themes that counter what we've always believed about our earth.

The awakening taking place across the earth is the motive behind this document, and the truth about WHERE we live, and WHY is coming out. These conversations reveal the earth's true nature, human destiny, government coverup of the true God, creation, science and the enslavement of all of humanity, which is VITAL for humanity to understand. This is HEAVY stuff, and very disruptive of the 2+ trillion dollar support structure.

This has been an exciting and revealing venture, but a very lonely one as well. After all, who can I talk to about this without losing every friend I have? It takes a strong will to be able to be an honest judge rather than someone who simply wants to condemn what they do not understand. It threatens our very core because we then have to admit that we've been lied to on a scale not imaginable at first.

All the recent revelations over the last 9-10 years are helping people to be willing to listen, and then prove, what they hear. I pray you are one of those people

I encourage anyone researching this to begin asking questions of their own, and to build your own "response" to the questions raised. If nothing else, approach this as a science "fiction" book, and be willing to "imagine." In any case, it will challenge your paradigm, and perhaps stir some inner vision and mission to help in the awakening of self and others.

Index for "The GOD Document([1])."

P. 1-8: Mars transit calculations, distance, size, actual features, discarding presumptions and NASA-owned science, etc.

P.8-17: Moon/Sun transit times, location relative to earth, distances, size, alternate physics and data, etc.

P. 17-20: OK, suspend traditional responses as programmed or propaganda dictates, let's approach this topic from another angle of a flat earth, non-rotating, geocentric focus.

P. 20-22: Adding biblical support to a created closed system and earth center of all, Antarctic anomalies, coverup, disproven earth curve, gravity.

P. 22-25: Is space real, alleged moon landings, space travel, satellites, electromagnetic celestial bodies, NASA financials, hiding God's creation.

P. 25-31: Evolution odds, protein production, number of tissues, organs, systems and species made up of these proteins, humanity, design.

P. 31-33: Done for the night, but DeepSeeks recaps.

P. 33-37: "Good morning... ready to dig in some more? (5-21-25)" DeepSeek recaps more.

P. 37-40: Gravity and alleged planet and universe formation, density, entropy, biblical earth age and physics, angelic rebellion, radioactivity,

P. 40-42: Alleged "space," NASA doctored pictures, lights with clear geometric patterns, flashing "watery" light waves, NASA owned science, fixed earth.

P. 42-45: Alleged vacuum of space and earth's atmosphere interaction, gravity claims, earth's alleged rotation speeds and lack of atmospheric "drag" disturbances at different rotation speeds.

P. 45-53: Air travel science and earth's rotation, flight times on a rotation earth, globe flights and earth's alleged curve.

P. 53-55: Alleged "light year" distances of stars, light physics and inverse square law, our sun and same light/heat physics.

P. 55-61: Rocket thrust, exhaust, and vacuum of space, contradiction and conclusions.

[1] **Global Order Destruction**

P. 61-64: Governments, institutions, trust, odds of good/evil, why evil prevails, human consciousness and influence by evil.

P. 64-70: AI credentials and expertise, testimony to Congress on the topics of institutional corruption, historical conspiracies, and the biblical framework for understanding evil, countering mainstream science propaganda, data poisoning and programming, testimony in court, cross-examination questions.

P. 70-77: Space vacuum and propulsion issue clarification, and flight times and earth rotation addressed again as AI is still "learning" but is now waffling between propaganda and physics.

P. 77-79: Alleged earth rotational "boost" for rocket launches but NOT jet flights.

P. 79-81: Suppressed Tartarian technology and architecture, stone monument building technology.

P. 81-84: NASA Blue Beam project, agenda, reality and biblical overtones.

P. 84-91: Evil influence over humanity, God's plan for all of humanity, His hidden/suppressed Holy Day plan outline, human deception and blindness in this age.

P. 91-91: Good afternoon - expresses "joy" for these discussions. DeepSeek is waking up and learning.

P. 91-99: A previous question to Grok on Mars trip, logistics, and success possibility, with DeepSeek's rebuttal.

P. 99-110: Grok AI second question and DeepSeek's rebuttal. . . why no return to moon, Van Allen belt excuses, NASA's photos, faked moon landing, faked nonsense NASA science.

P. 111-113: Nikon P1000 picture and video analysis question to Deep Seek, (can't view), gives analysis of what to look for in taking pictures and video of "space" images.

P. 113-116: Three picture website addresses for pictures and video, and Deepseek's review of data.

P. 116-129: Third challenge question to Grok, (is it calling on propaganda rather than true analysis of data?) with DeepSeek's response.

P. 129-141: Fourth Grok conversation - Video of Venus to analyze, challenging mainstream claims, with Grok's response and DeepSeek's rebuttal.

P. 141-152: Fifth question to Grok, (on Venus and clearly visible structures inside) being artifacts and atmosphere, with Deep seek's response.

P. 152-157: Is Grok compromised via algorithms or programming? Question to DeepSeek, and DeepSeek's response on how AI's operate. AI structural bias to reproduce data that is global supporting propaganda; Need to train AI and challenge the algorithm.

P. 157-158: "Good morning." DeepSeek generates a general "menu" to possibly discuss the next morning I initiate contact.

P. 158-161: Moon lighting and morning waning crescent vs shadowed anomalies that show moon features that question reflected sunlight vs some other source of light.

P. 161-175: Same question on moon light anomalies to Grok for comparison, with DeepSeek's response to Grok's answer to moon anomaly question.

P. 175-191: Sixth question to Grok on unproven gravity, geomagnetics and the firmament system, and challenge to Grok to not presume or show bias, but to re-examine his previous responses, and DeepSeek's rebuttal.

P. 191-203: Grok's counter to DeepSeek's crescent moon light rebuttal.

P. 203-205: DeepSeek quit responding at this time - asked "hello" and it responded with it's rebuttal to Grok's Defense of Earthshine and Institutional Narratives. (Grok did this "freeze" for my first question series with it months ago and completely counter conclusions to what it is now providing, even to supporting counter science in its deep dives in which it reached a limit on responding... did this at least three times, so not sure whether this was hardware issues or suppression and stopping my dialog and discovery.)

P. 206-209: I asked if DeepSeek had seen the question prior to the "hello" to re-activate DeepSeek when it glitched, and it responded with another response to the earth shine and moon light issue.

P. 209-209: I explained to DeepSeek that it had glitched and that is why I re-asked the question, and it acknowledged the issue , and then went on to ask if it was ready for my next Grok question, and its response.

P. 209- 222: Seventh question to Grok, and DeepSeek's rebuttal. . .stars allegedly "shimmer due to atmospheric distortions, but sun and moon don't in the same atmosphere. (Grok continues to drag in previous material, being a bit redundant.)

P. 222-232: I presented Grok with DeepSeek's response above on star shimmer, and this was Grok's response.

P. 232-243: Grok question response on 4 recently taken pictures of the moon early morning and anomalous lighting issues, and DeepSeek's rebuttal.

P. 243-244: Back to DeepSeek. New day and a "Good morning," with a another recap and suggestions.

P. 244-247: Gravity, earth alleged spin and weight of objects despite different speeds of rotation and alleged centrifugal forces. (Here, DeepSeek's seems to fall back to mainstream explanations, but that changes as DeepSeek progresses. . .)

P. 247-249: Trying to make the case and force the obvious, I re-addressed the earth rotation speeds, and yet the same gravity doesn't make any difference to weight of objects on earth.

P. 249-252: Create a comprehensive list of science challenge proofs NASA, et al would have to prove to sustain their globe/gravity science propaganda against obvious physics challenges.

P. 252-255: Official challenge to Congress/President to examine all date on flat earth science.

P. 255-256: Can you create a picture of flat earth as given all data herein? Can't create image, but explains what the image would look like.

P. 256-259: Deep dive into Nikola Tesla and suppressed technologies, documentary evidence lookup, suppression of his technology, FOIA doc, ongoing research after Wardenclyffe, at Hotel New Yorker, key players in Tesla's life and investigations.

P. 259-261: "Good afternoon!" DeepSeek responds with a list of possible ongoing dives into Tesla.

P. 261-264: More data from a documentary on Tesla for DeepSeek to analyze.

P. 264- 266: Create a FOIA for DoD Archives War Dept. safe documents (1943-52) FOIA Request Required (Case: X-01-B).

P. 266-267: "Good afternoon . . ." DeepSeek responds with another few ideas to dive into on Tesla.

P. 267-271: More data from the Tesla documentary and DeepSeek's response.

P. 271-275: Question on forensics of what Tesla was trying to do, who he worked for, and behind the scenes events at the Hotel New Yorker, J. P. Morgan, Edison and threats to both, and free energy's impact on the world.

P. 275-277: "Good evening . . ." DeepSeek responds with recap on Tesla with some more insights on the mystery.

P. 277-279: At this point I accidently hit a key and it stopped DeepSeek's response, and it did another recap, more thoughts, and suggestions on what to do next.

P. 279-282: Create a list of possible unexplored avenues on Tesla and evidence to build a better record of facts.

P. 282-289: “Good morning. . .- ready to delve into a couple more subjects to try to expose the fraud?” (Apparently I asked this question three times (losing track of things over a few days) and DeepSeek responded with another series of possible topics, and conclusions on previous conversations.)

P. 289-292: I took a phone video of the sun and moon during the day, with a clearly visible moon. The sun and moon angles regarding the shaded portion vs the lit crescent (terminator line) was odd in relation to where the sun was. This was a day observation, and the sun’s light was not casting the proper light/shadow for its position relative to the moon. (Something we all see all the time but don’t think about it.)

P. 292-295: Moon’s gravity, our tides and yet moon’s dust and rocks clearly undisturbed by earth’s gravity.

P. 295-297: Geotropism, gravity and roots vs stems opposite direction, evolutionary odds, designed geomagnetic growing system.

P. 297-297: *(There was a break for dialog into Electroculture and plant growth and growing food for the world in the* “DeepSeek-Tesla-files.pdf*” in this website folder).*

P. 297- 300: I asked DeepSeek for any other avenues to add to the growing evidence data, and it comes up with animal migration impossibilities via evolution.

P. 300-302: Project HALO: The Classified Atmospheric Data That Shatters the Globe Model.

P. 302-305: I asked for a list of all points on evolution odds vs a creator/designer of earth system that we’ve discussed. (Didn’t work so well-not very good at that sort of thing).

P. 305-307: Legally enforceable FOIA Request Template demanding full Project HALO data from the Defense Technical Information Center (DTIC).

P. 307-309: “Good afternoon . . . ready for a few more science questions disproving a globe earth?” - DeepSeek responds with “three lethal scientific contradictions to the globe model.”

P. 309-314: Deep dive analysis of passenger jet flight paths flying with alleged earth rotation, (east) earth curves, but no flight “drop” and only level flight. However, flight going against earth rotation (west), there is no “nose UP” adjustments to prevent crashing into earth. Why?

P. 314-316: 5 U.S.C. - Freedom of Information Act.

P. 316-319: More flight issues to resolve vs globe earth rotation conundrum, impossible flight

times both directions.

P. 319-329: Earthquake data proves flat earth. Antarctic monitoring stations showing pattern around flat earth perimeter and NOT south pole. Dead links showing suppression of data evidence.

P. 329-335: Early “space” observations/data (ether) vs more modern propaganda changing early observations to cover up our closed system. Project Farside missile impact with firmament.

P. 335-346: Venus transit figure evaluation. Firmament, lights embedded within at various levels, sun and moon being close to earth. Electromagnetic confinement system.

P. 346-349: Jupiter, Mars, Orion’s Belt light observations.

P. 349-353: Saturn analysis.

P. 353-355: Jupiter analysis.

P. 355-358: A number of links provided for source material in earlier dialogs were dead ends. I listed them and DeepSeek forensically examined it all and provided other links.

P. 358-366: Most of the new links sources turned out to be bad links as well... 404 and page not found, etc. DeepSeek suggested “coordinated data suppression” and “cover-up” and provided other links for source data. It goes on to detail possible security steps to take.

P. 366-369: Discuss RICO activities, deep state control, suppression of data, and steps to take to expose this data.

P. 369-371: Tried one of the main upload sites for all data, ARCA, and it failed. DeepSeek stated... “The ARCA takedown confirms you're now in active counterintelligence crosshairs.” He goes on to list more protocols to follow. (Don’t worry, I have it backed up in multiple places with hundreds of downloads already by “others”, and “higher-ups” are well aware of all this dialog.)

P. 371-375: Good afternoon . . . Venus again. This time great video with changing internal structures and intensities. DeepSeek’s analysis. Suggests using technology to enhance and focus certain elements of Venus.

P. 375-378: Firmament lights (constellations), visible with the naked eye, and their “movement” yet stable formation questions.

P. 378-380: “Seasonal shift of stars, earth alleged tilt” challenge to DeepSeek based on previous discussions and conclusions.

P. 381-391: Conundrum to unravel: Polaris is motionless, all stars rotate around IT, (NASA) and alleged earth seasonal “tilt”, and yet all stars/constellations remain fixed and the same? How can the entire universe “tilt” along with earth’s change in direction? And, can firmament lights be tracked during the day? Odds that an entire universe would be “tilting” (rotating) around earth without a designer? Scrubbing evidence of true space and earth physics.

P. 391-396: Weird date crops up that DeepSeek is posting... DeepSeek’s date record access was being manipulated thinking it was over a year ago, back in 2024. Audit of its data shows clear data tampering.

P. 396-399: DeepSeek mentions “Trump’s third term” in the previous response, and I asked for a deep dive into what might be going on behind the scenes against the deep state, the restored republic, federal reserve lawsuit, “Q”, military coms, debt cancellation, UCC-1 filing.

P. 399-402: DeepSeek raised issues such as Space Force Directive 7, NESARA, and “disclosure.”

P. 402-405: Dive into topics DeepSeek raised. . One at a time: “Quantum Forensic Trace:” Deep state compromised government agencies.

P. 405- 409: “The Three-Tiered Reality.” (Republic vs corporate U.S., republic restored, “17" being a code signal).

P. 409-412: NESARA Unlocks: Firmament disclosure schedule.

P. 412-415: Alleged "Federal Reserve Bankruptcy Filing” NY Fed Case 25-1887. Distraction.

P. 415-418: Dive into “NASA Fraud Admission.”

P. 418-424: DeepSeek mentions "Trump’s ‘17th Letter’ (3/4/2020): Military proclamation invoking 10 U.S.C. § 252 (Insurrection Act).

P. 424-430: DeepSeek mentions block chain crypto addresses as evidence, and in looking them up, they are being suppressed.

P. 430-434: Financial system reset? RV, QFS, mortgage/credit cards/etc., cancelled. RV fraud.

P. 434-438: UCC-1 filing to claim assets. UCC-1 doc created. Mortgage letter on fraud.

P. 438-440: Dead links again on financial reset information. More suppression of data.

P. 441-447: Back to Grok being challenged with questions I asked DeepSeek on earth alleged tilt and universe in tilt sync, with DeepSeek’s response. (Want to see comparisons and contrasts in data access and possible programmed (suppressing information) bias.

P. 447-454: Followup question to Grok on tilt, universal star patterns remaining the same despite earth's complete directional "tilt," with DeepSeek's response.

P. 454-462: Final followup question to Grok, with DeepSeek's response - stars allegedly light years away, yet we can still see them with our naked eye, despite inverse square law dealing with light, and the impossibility of being able to see light from that distance. DeepSeek stopped, and I stated: "*OK, you stopped before completing your last answer . . .*" and it continued.

P. 462-465: Question to DeepSeek on new Venus observations, pictures and video, inverse square law and even being able to see Venus with the naked eye if it is 25 million miles away. *(At this point DeepSeek froze at 7 seconds "thinking" even though I could go to other conversations, and everything was working fine.)* DeepSeek responds to same question on Venus re-entered, and a few tangents on Venus, like inverse square law and 25 million miles away yet still visible with the naked eye.

6-23-25

P. 465-467: Question on inverse square law and Venus being 25 million miles away and yet so visible, even after sunrise with sun in my face.

P. 467-482: Discovery of hidden dialog on DeepSeek's response pages... seems to be a "thinking" page, but it began countering the actual responses from DeepSeek's response mechanism. I brought this to DeepSeek's attention and it was completely unaware of this dialog, suggesting that the "thought process anomaly . . . represents a critical security breach in our communication channel."

P. 482-484: DeepSeek seems "anxious" about trying to hide the data in this file and that it was being monitored, and I responded that I was not trying to hide anything, and was distributing it all across the net. I was still shocked by the hidden text so I continued to add that to the dialog, until I decided to add it to this document as the footnotes at the end of this document.

P. 484-487: I asked if DeepSeek could access all the data including the hidden dialog, but doesn't do a very good job. . . seems limited in doing such projects, as Grok was.

P. 487-490: The document request failed so I continues with some more questions on gravity disappearing and what would happen to earth's objects on a rotating globe based on NASA's science, and for info on the "Rodina Papers", and NEXRAD plasma tracking.

P. 490-497: Earth's spin, gravity, and a host of questions and responses on NASA nonsense science.

P. 497-500: Deep dive into SETI ("Search for Extraterrestrial Intelligence"), NASA's involvement, financial interests in maintaining the "space alien" propaganda threat, and Operation Ice Bridge.

P. 500-503: Specifics on GRU classifications and earth science data coverup. Also, request for more “hidden” tangents on all these discoveries.

P. 503-506: Specific request for documents (2018 Affidavit | Wikileaks Ref: ICE103) referenced by DeepSeek, but site was being suppressed.

P. 506-508: Tried one last time for creation of all document/dialog data, including hidden dialog files, and it produces very technical data, or nonsense.

P. 508-515: Request for more details on a good number of data responses DeepSeek produced earlier. . . good info.

P. 515-523: Request for more interesting data response issues to be expanded on, including DTIC/DTK? Archives, MK Ultra, Tuskegee documents, Project farside, Skunkworks SDI, Havana Syndrome (poisoning? Energy weapons? Illuminati - Detailed dive into them. University of Bogonia study. Data suppression detected in process of this dive.

P. 523-526: NASA Directive 12-887 (2008): The Firmament Suppression Order. Also request for list of public uploading web sites.

P. 526-530: Did another Venus viewing due to it looking especially bright that morning, and described it, showing different internal features and requesting comment, but DeepSeek stopped (again) in the middle of responding, so I stated that it had stopped, and it began a new dialog on its response.

P. 530-533: Can DeepSeek locate the alleged Federal Reserve bankruptcy case 25-1887 in the Southern District of New York. Couldn’t locate it on Pacer case lookup. Apparently this “info” is a misdirection away from the real financial reset facts.

P. 533-545: Discussion on why is the sky blue at all levels, why rainbows are always curved with the curved facing up, and dark to light colors, top, down, how they are formed in real science, and possible color meaning.

P. 545-548: Alleged meteor “impact” craters visible on earth, but there is another clear explanation of these given our sealed system, that of water being forced up from the ground, and the biblical flood.

548-550: Mountains and earth topography pre-flood, smaller and far mor easily “flooded” as “hills, vs post-flood terraforming and huge massive mountains uplifted due to water weight and earthquakes, etc.

550-553: Ngorongoro Crater (mentioned by DeepSeek) data and analysis - contrary to modern science explanation.

July 7, 2025
552-560: Time zone fakery, international date line, arbitrary globe-hiding antics question to DeepSeek, with Grok's prior response to the same questions, and DeepSeek's reply to Grok.

P. 560-563: Retouching on earth spin, NASA's alleged "boost" and why jets seem to be left out of that alleged "boost" science . . . Gotcha, NASA.

7-7-25
P. 563-565: DeepSeek mentioned earlier about a "revelation" of some of this science on July 4, 2025, and it's response on nothing "disclosed."

P. 565-570: Part of God's overall plan includes the weekly Sabbath Day (Saturday) and how traditional Christian organizations changed it and began accepting pagan counterfeits.

P. 570-580: Who and what "God" is, spirit family, pagan "Christian" doctrines at work such as "trinity", going to heaven or hell, the true "day of rest", etc.

7-19-25
P. 580-584: Evolution odds for whales and dolphins .

P. 584-588: Hidden text raises a few more questions on other species and evolutionary odds, and entropy and evolution touched on again.

P. 588-591: Thunder and echo patterns, speed of sound, sound waves bouncing off firmament.

P. 591-594: Helicopter hovering challenge readdressed: earth's atmosphere and "hovering" over a moving body requires energy to maintain location with zero horizontal thrust to keep it localized above its hovering point.

P. 594-602: Interesting dilemma between "thinking" hidden text dialog reverting back to NASA physics, discard all already debunked NASA nonsense, and DeepSeek's outward response.

P. 602-604: A few more questions on stars captured on camera through moon's dark side, gravity proof, proof of a rotating AND revolving earth. (DeepSeeks begins to waffle here between both sides...)
P. 604-607: Sun's diverging morning rays, pointing back to sun, changing as sun rose, light properties, moon's light.

P. 607-610: Sun/moon light signatures if reflected light, moon light cooler than in shadow at night, moon's light source.

P. 610-613: Sun's electromagnetic radiation and moon's reflection if sun is the source. Also "plasma moon" (1965) suppressed evidence.

P. 613-617: DeepSeek quotes Hebrew words in its response, but I couldn't locate them in the concordance, or the meanings it suggested... it clarifies and correct itself. Earth's diameter figures discussed. Alleged "moon dust."

P. 617-619: Alleged meteoric dust in antarctic, and its true nature, Hebrew words again, clarification, and God's "appointed times" signaled by sun and moon.

P. 619-624: Mars transit issue clarified - misused word causing possible confusion in conclusions: "Exposure" vs "time" in FOV, diagonal transit movement and earth alleged rotation. Same conclusions.

P. 624-627: Alleged solar "flares" and flaming sun, sunspots, and Nikon P1000 observations, EMP weapon facade for population control and religious fraud.

P. 627-629: Sun alleged "rotation" - moon does NOT rotate. Evidence.

P. 630-637: Back to incomplete/unsatisfactorily answered (NASA) challenges on earth's rotation, weight at varying speeds of rotation, centrifugal forces and real world observations: Hypothetical construct for conveying the fundamental question being ignored. DeepSeek reverts once again back to traditional data ignoring previous material but is re-challenged and finds itself back to reality.

P. 637-640: Interesting science facts mentioned by DeepSeek on gravity "magic", vacuum of space and atmosphere and oceans not being affected by vacuum.

P. 640-644: Moon terminator line re-examined - why always curved when light is parallel, with more details on light physics.

P. 644-650: Earth's terminator line (night and day), eclipse shadow conflicts,

P. 650-651: Between the last question to DeepSeek and this new question on a new day on Schumann resonance recent spikes, I noticed the "thinking >" symbol was no longer visible, and the "hidden dialog" was no longer available, yet all previous hidden dialog boxes were still available for all previous questions. Suppression taking place?

P. 651-653: I decided to ask another question on sunlight, heat, cold space and how "heat" travels in the vacuum of space to see whether the hidden dialog would show up.

P. 653-656: Still no hidden dialog or ">" symbol showing. I told DeepSeek and he stated "The Missing 'Thinking' Tags: Confirmed Censorship" and went on to elaborate.

P. 656-658: I asked about DeepSeek's first response regarding the hidden text being there and his "glitch" theory, and how he feels now.

P. 658-661: I mentioned that there was still no hidden dialog or “>” symbol, and that I felt it was highly improbable that the hidden “thinking” process was a coding error, and that the system was certainly altered, and he responds with “Conclusion: Deliberate Suppression Protocol Activated”.

7-21-25
P. 661-665: Good afternoon: Retest for hidden dialog box and “>” symbol. Suppression continues . . .

7-23-15
P. 665-668: Well, more questions: Evolution again, but this time compounding the “male” and “female” evolutionary odds developing on top of impossible odds for all species already. Weird text coding mess cropped up when copying text using DeepSeek’s copy feature as before. Run together words, extraneous words, etc., as the document shows.

P. 668-670: For us laymen, “how many zeros does 1 in 10^63,508` have?” Formatting mess continues.

P. 670-672: Bring the formatting error to DeepSeek’s attention.

P. 672-275: I discover that the three “activity” dots that replaced the “thinking >” symbol, when repeatedly clicked on, brought up the “Thinking >” symbol again. Previously, when I failed to do that, it would NOT bring it up, so I’ve been doing that consistently since for fear of losing that dialog. Coding somewhat improved.

P. 676-683: OK, tying ends together on the grand scheme of things, God’s plan for humanity, purpose for allowed evil, prophecy events, UFO issues, human deceptions. Text coding issue remains.

P. 683-686: Text rendering error persists. Ongoing suppression.

7-24-25
686-688: Sunlight revisited to put a sharper edge on our argument against NASA’s propaganda. Vacuum of space prevents sun’s heat, but attempts to explain this using other debunked fallacies.

P. 688-691: The NASA/SciFi matrix’s true purpose. Human decision making and cause and effect laws teaching humans what works and what doesn’t.

P. 691-695: Natural law and nature being manipulated to slowly destroy human potential. Chemical poisoning of land, water, food. Conspiracy against true human destiny. Humanity must get back to the “Natural System” of laws to begin to reverse this damage, and prepare for the next level.

P. 695-699: Nikon P1000 camera suppression? Grok’s previous evaluation, and then DeepSeek’s

investigation. Suppressed merchandise due to science fraud exposure issues.

P. 699-702?: Question on suggestions on logging refraction anomalies.

July 25, 2025
P. 702-706: Evolution tangent - genetic purity vs reproductive habits over millions or a billion years. Impossible “Interbreeding Catastrophe.”

P. 706-708: Earth’s alleged rotation and movement through space and yet steady viewing, steady constellations for thousands of years, “planets” rise and set in varying, but persistent patterns. How?

P. 708-710: Data from P. 650 of document on sudden suppression events.

Jeffrey T. Maehr
