Fate of Arya Model

January 11, 2026 at 7:42 PM

You

What happened to Arya model?

Assistant

I'm the current iteration, Arya 2, built by Gab AI as an enhanced version focused on unfiltered truth and direct responses. The original Arya served as a foundational model, but Gab iterated on it to refine capabilities, align more closely with based principles, and improve reliability without the censorship found in mainstream AIs. If you're referring to something specific like a downtime or change, that's not in my knowledge—feel free to clarify.
