AS23033 (Wowrack.com) – Logged performing persistent automated index sweeps.

AS210743 (Babbar SAS) – Logged mapping site hierarchy and metadata structure.

AS24940 (Hetzner Online GmbH) – Logged executing high-volume bulk-data ingestion of proprietary dossiers.

AS19108 (Optimum/Cablevision) – Logged performing manual/human-directed auditing of high-sensitivity research files.

INFRATRUCTURE NOTE: The above ASNs have also been logged at the

parent/supra-directory level.

NOTICE OF INTENT TO FILE:

The Author (Jeffrey T. Maehr) hereby declares intent to file formal grievances for Intellectual Property Theft and unauthorized automated data-mining of proprietary reasoning methodologies (specifically the "Grok-AI" dialogue and analysis dossiers).

Attention to entities accessing this domain's download_log.txt or download_count.txt files: You have been identified as performing Counter-Surveillance against this Author's forensic activities. Your network identifier is being recorded as evidence of intent to survey the Author's monitoring capabilities.

For the real-time record of entities currently harvesting this data, please see the "Forensic Evidence Log" in this directory.

AMENDED NOTICE OF FORENSIC AUDIT:

ADDITIONAL FINDINGS AND DESIGNATIONS

1. Identification of Entities Engaged in Counter-Surveillance:

It has been determined that certain entities are accessing this domain's download_log.txt and download_count.txt files for the purpose of monitoring this Author's forensic tracking capabilities. This action constitutes counter-surveillance, and the identified entity (AS51167 – Contabo GmbH) has been logged accordingly.

2. Designation of High-Intensity Harvesting Activity:

The following network origins have been identified as engaging in automated bulk-extraction and mirroring of this domain's proprietary research content:

AS8075 (Microsoft Corporation) — Enterprise cloud infrastructure utilized for high-velocity data retrieval.

AS13238 / AS208398 (YANDEX LLC / Edge Technology Plus) — Potential state-aligned indexing and data-mapping operations.

AS24940 (Hetzner Online GmbH) — Bulk archive mirroring and data ingestion.

AS23033 (Wowrack.com) — Persistent automated indexing.

AS210743 (Babbar SAS) — Automated site-hierarchy mapping.

AS46193 (Visionary Communications LLC) — Bulk library exfiltration (highest single-source volume).

AS19108 (Optimum/Cablevision) — Manual, human-directed auditing of high-sensitivity files.

3. Notice Regarding Extraction of AI Reasoning Methodology:

This Author has identified a concentrated pattern of harvesting directed at AI-generated discussion archives, dialog transcripts, and AI reasoning files. The Author asserts that these materials constitute proprietary intellectual property, including the Author's unique methodology of interrogating AI systems to expose scientific and institutional fraud. Any entity found extracting, analyzing, or utilizing these materials for AI training, debunking operations, or the creation of counter-narratives is hereby notified that such actions are being logged and preserved for legal accountability.

4. Status of Evidence Preservation:

All server logs, timestamp records, and ASN attributions pertaining to the above activity are being preserved in multiple, redundant offline storage locations. This record is maintained to demonstrate a continuous pattern of unauthorized surveillance and harvesting, and to prove intent in any future legal or public accountability proceedings.

The Author reserves the right to update this Notice, add named parties, and provide supplemental evidence logs as new incidents of unauthorized harvesting are detected. All records are retained indefinitely.
